Emergency Programs
Coordination, Planning & Training
Emergency Programs

- State Homeland Security Grant Program
- Local Emergency Planning Committee
- Hazardous Materials Preparedness
- Hazards Analysis
- Radiological Preparedness
- Treasure Coast Regional Evacuation Study
- Post-Disaster Redevelopment Planning
State Homeland Security Grant Program

• **Exercises – Tabletop, Functional & Full-scale 26**
  Continuity of Operations
  Communication & Information Technology
  Terrorism Incident Response

• **Responder Discipline Training 650**

• **Planning Projects 19**
  Field Operating Guidelines
  Comprehensive Emergency Management
  Continuity of Operations Plans
  Terrorism Response Plans
  Tactical Interoperable Communications
  Post-Disaster Redevelopment Plans
District 10 Local Emergency Planning Committee

• State Emergency Response Commission

• Regional Coordination
  Law Enforcement, Fire/Rescue, Health, Emergency Management & Chemical Facilities

• Regional Response Training, Planning & Exercises 15

• Extremely Hazardous Substances Regional Repository – 525 facilities

• Regional Hazardous Materials Response Plan review and maintenance.
Hazardous Materials Emergency Preparedness

• Florida Division of Emergency Management Agreement – Department of Transportation

  - Training First Responder: Incident Commander, Chlorine Gas, Chemical Suicide, Meth Labs, Ammonia Release

    SINCE 1995 – 12,440 Trained

  - Planning Projects: Hazmat exercises, Facility outreach, Community education

2012 Commodity Flow Study
Chemical Hazards Analyses

• **Conduct facility compliance site visits**
  – Chemical storage
  – Chemical quantities
  – Risk and Vulnerability assessments

• **Provide technical assistance to:**
  - County and Municipal governments
  - Chemical facilities
  - Florida Division of Emergency Management
Chemical Plume Risk Modeling
Radiological Preparedness

• State Division of Emergency Management – Technical Hazards Section

• Over the last 12 months:
  – Developed State Radiological Awareness Level Classroom curriculum and delivered.
  – Trained 120 State & local responders in 18 Risk, Host and Ingestion Pathway counties.
Statewide Regional Evacuation Study
Treasure Coast Study released December 9, 2010

ANNIVERSARY

• First study conducted statewide - “All Hazards” approach to disasters using consistent methodologies in Evacuation and Transportation analyses.

• New accurate LIDAR and SLOSH modeling (Light Detection and Ranging) (Sea, Lake, Overland Surge from Hurricanes)

• New Shelter, Hazards, Vulnerability and Demographics, Behavioral and Transportation Analyses.

• New Regional and County Storm Surge Atlases.

• Emergency & Growth Management planning assistance for evacuation clearance times, shelter usage and regional development impacts.
Post-Disaster Redevelopment Planning

- Indian River, Martin, Palm Beach & St. Lucie

- Policies: recovery and re-development.

- Strategies: mitigation and operational procedures

- More Resilient Communities

- Elements include:
  - Social/economic impacts
  - fiscal & regulatory policies
  - infrastructure capacities
