The Intergovernmental Coordination and Review process serves, in part, as an early warning system for the federal government to determine if a federally funded project is consistent with plans and ongoing community initiatives of local governments and the regional planning council. The review process is intended to inform the applicant of potential concerns or inconsistencies regarding the proposed activity. Council has requested comments from potentially affected local governments in an effort to avoid duplication of efforts, funding, services, and to ensure the efficient use of resources.

The attached Intergovernmental Coordination and Review Log presents four applications for federal funding of projects or programs. The Review Log contains the applicant’s name, project location, project description, federal funding source, and the amount of funds requested, as well as designation of Notification of Intent if it is a preliminary application. Staff recommendations are provided on the consistency of funding applications with the Strategic Regional Policy Plan.
