To: Council Members

From: Staff

Date: July 21, 2017 Council Meeting

Subject: Tri-Rail Coastal Link Update

Introduction

For more than a decade, Council has been assisting the South Florida Regional Transportation Authority, Florida Department of Transportation, agencies, and local governments with planning and technical assistance in support of the expansion of Tri-Rail service onto the Florida East Coast rail corridor. The Tri-Rail Coastal Link project is anticipated to include up to twenty-five stations between Miami and Jupiter and will provide commuter transportation in the hearts of the downtowns along the Southeast Florida coast.

Council staff will provide an update on this project at the July 21, 2017 meeting.
